Chartered Accountants Worldwide Pledge

RESILIENCE FIRST

Chartered Accountants Worldwide Pledge

Chartered Accountants Worldwide has partnered with Resilience First to become a recognised leading player in contributing to a better, safer world, through partnership of the UNFCCC's Race to Resilience Campaign.

In becoming a partner and joining the campaign which aims to build global resilient communities, Chartered Accountants Worldwide has signed up to a pledge that includes certain commitments which would minimise businesses' risk whilst evolving our climate resilience plans.

Chartered Accountants Worldwide pledges to:

- 1.** Use the Resilience First Resilience Self-Assessment Tool to measure our resilience and track resilience improvements.
- 2.** Appoint a 'climate advocate' and/or 'resilience advocate' within our organisation who will champion resilience and sustainability standards and initiatives internally and/or demonstrate their commitments to one or more of the UN's 2030 SDGs as well as share their good work across the Resilience First network.
- 3.** Proactively share our business' resilience best practice within the Resilience First network through contributions to the Resilience Knowledge Hub (online library of resources) and Thought Leadership articles to the network's monthly newsletter. As well as attend at least three webinars/ events annually and speak at Resilience First events/webinars when invited.
- 4.** Commit to the programme to drive action by 2030. In addition to the pledges, Chartered Accountants Worldwide will be required to undertake and report results of an annual resilience survey, which will address issues around the following key areas relevant to the Race to Resilience:
 - **Plan:** The sharing of a specific climate resilience plan for the business and community we operate in.
 - **Proceed:** The timeframe for the implementation of the plan.
 - **Publish:** To share any outcomes from the plan, including the total number of people impacted by the plan (to include total number of employees, suppliers and end-users or consumers)
